## CATEGORY D Pressurized Welding Habitat

- Deployment of Safe Welding Habitat.
- Procurement of Habitats
- Maintenance and Repair of Safehouse Habitat
- Project Support Services
- Training and Certification of Technicians
- Inspection and Re-certification of Equipment

# Category A

## Fire Brigade & Emergency Response

We deliver comprehensive fire safety and emergency response services designed to safeguard personnel, assets, and critical infrastructure, particularly in high-risk industrial and energy environments.

### Outline

- ✓ **Fire Station Management**
- ✓ **Fire Protection Services**  
(Design, Supply, Installation & Maintenance)
- ✓ **Equipment Procurement**
- ✓ **Consultancy Services.**
- ✓ **Oil Spill Response.**

We provide full operational management of fire stations, including staffing, training, equipment readiness, and emergency preparedness, ensuring rapid response capability and operational efficiency.

We design and implement integrated fire protection systems tailored to facility requirements. Our services cover the supply, installation, testing, and ongoing maintenance of fire detection, suppression, and alarm systems to ensure continuous protection and regulatory compliance.

## Equipment Procurement

We source and supply high-quality firefighting equipment, tools, and protective gear from trusted manufacturers, ensuring reliability, durability, and adherence to international safety standards.

## OEM Partnerships

Through our Original Equipment Manufacturer (OEM) partnerships with NAFFCO and MSA Safety, we deliver globally recognized firefighting equipment, safety gear, and fire protection technologies that meet international quality and safety standards.

We provide rapid response solutions for oil spill incidents, including containment, recovery, and environmental mitigation measures designed to minimize environmental impact and support safe operational recovery.

Our expert advisory services support clients with fire risk assessments, emergency response planning, safety audits, regulatory compliance, and the development of effective fire safety strategies.

## Fabric Maintenance & Support Services

### Outline

- ✓ Inspection and Advanced NDT
- ✓ Insulation, Cladding & Corrosion Control
- ✓ Rigging and Slings
- ✓ Welding and Fabrication

## Inspection and Advanced NDT

PASS advanced inspection and NDT services give you unparalleled insight into the condition of your assets. Our expert technician provides accurate, reliable assessments, enabling you to make informed decisions on the life of your assets.

At PASS, we provide a full range of NDT (conventional techniques for specialist solutions). Our conventional NDT services include Ultrasonic testing (UT), Magnetic particle testing (MT), Visual Inspection (VT), Penetrant testing (PT), Eddy current testing (ET), and Radiography, which are used for routine assessment, identifying potential issues such as cracks, corrosion, and material degradation without interrupting operations. These methods are cost-effective and allow for rapid, non-invasive assessments.

In addition to conventional methods, PASS also provides specialized NDT services using advanced techniques like PAUT, TOFD, ECA, PEC, QSR, corrosion monitoring, flange face, and digital radiography. These methods are used for more complex inspections, such as internal defect detection and inspection of hard-to-reach areas, ensuring comprehensive coverage of your assets.

We deliver a comprehensive range of insulation solutions, including thermal, cryogenic, noise protection, and acoustic insulation. Backed by strong technical expertise, we also provide specialized engineering and installation services that support critical industrial infrastructure across both greenfield and brownfield facilities.

### Our services include:

- Installation for Pressure Vessels, Plant Modules, and Jetties.
- Technical support, supply, and installation for greenfield and brownfield projects.
- Corrosion under-insulation remediation.
- Planned maintenance and shutdown campaigns.
- Fire protection.

## Installation for Pressure Vessels, Plant Modules, and Jetties

We provide expert installation services for pressure vessels, plant modules, and jetty infrastructure, ensuring strict compliance with industry standards, safety regulations, and operational requirements. Our experienced team delivers precise execution, guarantees structural integrity, and ensures seamless integration within complex industrial environments.

## Technical Support, Supply, and Installation for Greenfield and Brownfield Projects

Our team delivers comprehensive technical support, equipment supply, and installation services for both greenfield developments and brownfield upgrades. We work closely with clients to ensure efficient project execution, minimizing operational disruptions while enhancing system performance and reliability.

## Planned Maintenance and Shutdown Campaigns

We support clients with structured maintenance programs and shutdown campaigns designed to ensure operational continuity and asset reliability. Our team plans and executes maintenance activities efficiently to minimize downtime while maintaining the highest safety and quality standards.

## Corrosion Under-Insulation (CUI) Remediation

We offer specialized solutions for detecting and remediating corrosion under insulation, a critical issue affecting asset integrity in industrial facilities. Our approach focuses on early identification, effective treatment, and preventive measures to extend the lifespan of equipment and maintain operational safety.

## Rigging and Slings

PASS offers expert rigging, slinging, design, engineering, and rope access solutions. Our team combines years of industry experience and a unique skill set in service delivery. We rig in accordance with industry standards and strict safety procedures.

The safety of our team is a vital pillar in our execution and delivery to the client. All personnel have the appropriate certification and experience to ensure works are completed safely and efficiently. These efforts reflect our commitment to delivering high-quality, safe, and efficient services to our clients.

## Welding and Fabrication

At PASS, we fabricate and install high-pressure and low-pressure systems. We are a trusted leader in precision welding and fabrication solutions.

**Pipe Fabrication and Installation:** Precision fabrication of process piping, including stainless steel and carbon steel pipe spools, ensuring compliance with stringent quality and safety standards.

**Pressure Welding and Testing:** We execute high-integrity pressure welding, including golden welding procedures, to guarantee pipe spool integrity and operational safety.

**Structural Fabrication:** Fabrication and installation of structural steel components to support pipe spool infrastructure.

**Quality Assurance & Compliance:** We implement strict quality control measures, including non-destructive testing (NDT), hydrostatic testing, and compliance with ASME welding.

## Our Core Capabilities

- ✓ Pipe spool fabrication
- ✓ Structural steel fabrication & welding
- ✓ Pipework prefabrication
- ✓ FIFO(Fly-In-Fly-Out) team for a remote project.

---

# Manpower Supply

## Outline

- ✓ Scaffolders
- ✓ Rope Access Technicians
- ✓ QA/QC Professionals
- ✓ Welders and Fitters
- ✓ Insulators
- ✓ Habitat Technicians
- ✓ Firemen
- ✓ QHSE Professionals

## Scaffolders

---

We provide highly skilled and certified scaffolding personnel for the safe erection, modification, inspection, and dismantling of scaffold structures across industrial and construction environments. Our team is well-versed in international safety standards and best practices, ensuring reliable access solutions for maintenance, shutdowns, and capital projects. With a strong focus on safety, efficiency, and structural integrity, we help minimize risks while maximizing productivity on site.

## Rope Access Technicians

---

Our IRATA-certified rope access technicians deliver safe, efficient, and cost-effective solutions for working at height and in difficult-to-reach areas. From inspection and maintenance to installation and repair works, our team operates with minimal disruption to ongoing operations. By eliminating the need for extensive scaffolding in many cases, we help reduce project timelines while maintaining strict adherence to safety and operational standards.

We deploy experienced Quality Assurance and Quality Control professionals to support projects in achieving full compliance with client specifications and industry regulations. Our personnel are skilled in inspection, testing, documentation, auditing, and quality monitoring throughout all project phases. By ensuring strict adherence to quality standards, we help clients deliver projects that meet performance expectations and regulatory requirements.

Our team of certified welders and mechanical fitters are experienced in fabrication, installation, and maintenance of pipelines, pressure systems, and structural components. We provide personnel proficient in various welding techniques and materials, ensuring precision, durability, and compliance with international standards. Our manpower supports both onshore and offshore operations, delivering reliable workmanship even in demanding environments.

## Insulators

We provide qualified insulation technicians specializing in thermal, acoustic, and fireproofing applications across industrial facilities. Our personnel ensure proper installation and maintenance of insulation systems that enhance energy efficiency, protect equipment, and improve overall safety. With attention to detail and adherence to industry standards, we help clients optimize operational performance and reduce energy losses.

## Habitat Technicians

Our trained habitat technicians support safe hot work operations in hazardous and controlled environments by installing and maintaining pressurized welding habitats. These habitats are designed to create a safe working zone by controlling atmospheric conditions and preventing the ingress of flammable gases. Our team ensures continuous monitoring and compliance, enabling critical maintenance and fabrication activities to be carried out safely.

## Firemen

---

We supply trained and experienced industrial firemen to support fire watch duties, emergency response, and risk mitigation across worksites. Our personnel are equipped to identify potential fire hazards, respond swiftly to incidents, and enforce fire safety protocols. Their presence ensures continuous monitoring during high-risk operations, safeguarding personnel, assets, and project continuity.

## QHSE Professionals

---

Our QHSE professionals are dedicated to driving a strong safety culture and ensuring compliance with health, safety, environmental, and quality standards. We provide expertise in risk assessment, safety supervision, incident investigation, training, and regulatory compliance. By integrating best practices into daily operations, we help organizations achieve safe, efficient, and sustainable project delivery.

# Category D

---

## Pressurized Welding Habitat

Pressurized welding habitat is a control enclosure that allows your team to safely perform hot work operations in a classified hazardous environment, such as zone 1 & 2, without compromising the safety of your plant or requiring shutdown operations.

It is highly recommended for all hot work operations in a live plant; it's flexible, fire-retardant, custom-made, automated, and ATEX and IECEx approved.

- ✓ **Deployment of Safe Welding Habitat.**
- ✓ **Procurement of Habitats**
- ✓ **Maintenance and Repair of Safehouse Habitat**
- ✓ **Project Support Services**
- ✓ **Training and Certification of Technicians**
- ✓ **Inspection and Re-certification of Equipment**
